## Product Description

### Decorative 3D Waterproof Wood Plastic Inner Round Grille Panel Wall Panel

WPC Inner Circle Grille Wall Panel is a wall finish panel designed to add beauty to a space while providing waterproof and durable performance. The wall panels are made from a combination of wood-plastic composites, a composition that enhances their water resistance and overall durability. The wall panel is three-dimensional, which means it adds depth and visual interest to the wall. It's designed to resist moisture, making it ideal for areas prone to moisture, such as bathrooms, kitchens, or basements. The interior of the grill pattern is circular and is mainly used for decoration. It can be mounted on an interior wall to enhance the overall aesthetic of a room, create a focal point, or add a touch of elegance and style. Wall panels are easy to install and are usually secured to the wall with adhesive, nails, or screws. Depending on the manufacturer, they may have interlocking features for seamless assembly. Wood-plastic composite panels do not need to be painted or sealed like traditional wood panels, and they can usually be cleaned directly with mild soap and water.
