Product Description

Environmentally Friendly Moisture proof Curved WPC Wood Panel 15mm Wall Panel

WPC curved panels are a combination of sustainable development and innovation. The wall panels are made from eco-friendly wood and plastic, ensuring a responsible and sustainable product. Eco-friendly means that the manufacturing process of the wall panels and the materials used in the construction are environmentally friendly, and by choosing these panels you can contribute to reducing the negative impact on the environment. The unique curved panel design adds a touch of elegance and sophistication to the wall. Curves create dynamic visual elements that enhance the overall aesthetics of interior spaces. Wall panels are made of wood plastic composite (WPC). Such composites typically combine recycled wood fibers or pellets with recycled or virgin thermoplastics such as polyethylene or polypropylene. By using recycled materials, the panel reduces its environmental impact and helps minimize waste.
