Product Description

Factory customized waterproof skin feel bamboo wood fiber wall panel wood veneer

The skin-feeling bamboo charcoal wood finish is waterproof, fireproof and environmentally friendly. Mugwort is a fast-growing plant that does not need to be replanted, making it an environmentally friendly alternative to traditional wood sources. Its rapid regeneration helps preserve forests and reduce the carbon footprint associated with traditional wood-based materials. Skin Feel Bamboo Charcoal Wood Veneer Through an advanced manufacturing process, the structure of the veneer is hydrophobic, making it resistant to water penetration. This remarkable feature extends the life of the unit, making it ideal for areas prone to high humidity or moisture exposure. By adding flame retardants to the bamboo fibers during production, the veneer can enhance fire performance and minimize the risk of burning. As such, skin-feeling charcoal wood finishes are a valuable addition to commercial and residential spaces where fire protection is critical. Designers and architects alike can take advantage of the beauty of the finish to enhance any interior space, adding a touch of luxury to a variety of design themes.
