SPC Wall Panel

Renovation of hotel bathrooms

Dedicated to shower rooms

Product Description:

The SPC Wall Cladding Panel is made from Stone Plastic Composite (SPC) material, which is known for its durability and resistance to wear and tear. The panel is available in thicknesses of 4-8mm, making it ideal for use in a variety of applications. The Stone Plastic Composite Wall Panel is designed to be fireproof and heat-insulating, providing an added layer of safety and comfort to your home or business. The panel is also moisture-resistant, making it a perfect choice for use in areas with high humidity or moisture levels.

The SPC Wall Panel is easy to install, thanks to its click stone design. This makes it easy to install the panel without the need for special tools or equipment. The panel is also easy to clean and maintain, making it a great choice for use in high-traffic areas.

Overall, the SPC Wall Panel is a versatile and durable interior decorative wall panel that is perfect for use in bathrooms, showers, and other areas where moisture and durability are important. Its beveled edge design, fireproof and heat-insulating properties, and easy-to-install click stone design make it an excellent choice for homeowners and businesses alike.
